Reprint, News-Herald: "There is at least one effectual, safe, and reliable cough cure—Dr. Shoop's—that we regard suitable, even for the youngest child. Feeding a Rubber Plant.
A New York woman has a rubber plant which she considers king of its kind. Standing on the sill of her front window, it reaches almost to the top of the upper pane, some of its leaves being over eighteen inches long. "It puts forth one new leaf every week without fail," she explains proudly. "And did you ever see such a fine glass and quality to the leaves of any other rubber plant? I'll tell you how it is. It's all due to feeding it properly. My plant gets good, rich food. Every time I buy mutton or beef for dinner I wash it carefully in a saucepan instead of holding it under the spigot, and afterward I pour the water, which has some of the blood of the meat in it, over the roots to give them strength. Then I also give my plant a tablespoonful of cod liver oil once a week. I feed it to the earth, and the plant drinks it up. I never heard of any one else feeding a plant this way. The idea is all my own, and I'm proud of it. I have never seen another rubber plant so strong and healthy as mine is."—New York Press.
